#### **NOTIFICATION OF ELECTION**

(PCT Rule 61.2)

Commissioner
US Department of Commerce
United States Patent and Trademark
Office, PCT
2011 South Clark Place Room
CP2/5C24
Arlington, VA 22202
ETATS-UNIS D'AMERIQUE

Date of mailing (day/month/year) 07 March 2001 (07.03.01)	ETATS-UNIS D'AMERIQUE in its capacity as elected Office
International application No. PCT/US00/18347	Applicant's or agent's file reference A0000096-01E
International filing date (day/month/year) 05 July 2000 (05.07.00)	Priority date (day/month/year) 16 July 1999 (16.07.99)
Applicant	
DIXON, Alistair et al	

1.	. The designated Office is hereby notified of its election made:				
	X in the demand filed with the International Preliminary Examining Authority on:				
	18 January 2001 (18.01.01)				
	in a notice effecting later election filed with the International Bureau on:				
2.	The election X was				
	was not				
	made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

PUBLISHER: RAVEN, NEW YORK, N. Y.,

#### Claims 1-25

claims 1-4 and 10-25

### (N)(IS)

Claim 1 describes the use of phenylamino derivates following formula (I) of claim 1 for treating chronic pain.

D1 discloses phenylamino derivates following formula (I) for treatment of cancer (D1, P9 L5, claim 24) and diabetes (D1, P9 L7, claim 29).

Additionally D8 (whole document) discloses a phenylamino derivate following formula (I) of claim 1 for treatment of cancer.

According to the description of the present application cancer (P1, L32) and diabetes (P1, L15; claim 4) are associated with neuropathic pain. Thus the treatment of cancer and diabetes implies the treatment of the associated pain. Consequently the subject matter of claims 1-4 and 10-25 is not novel and inventive (Article 33(2) and (3) PCT).

#### claims 5-9

- (N) D1 discloses the use of phenylamino derivates following formula (I) for treatment of proliferative diseases like cancer. Malfunctions as defined in claims 5-9 are not disclosed. Therefore the subject matter of claims 5-9 is considered to be novel.
- (IS) There is no evidence in the description of the present application, which suggests that compounds as defined in claim 1 have an effect for the treatment of chronic

**EXAMINATION REPORT - SEPARATE SHEET** 

pain associated with malfunctions described in claims 5-9. All biological examples (P46-53) are based on the treatment of diabetes. However no basis for the treatment of chronic pain associated with the claimed malfunctions is given. If the applicant is the opinion that the treatment of the malfunctions defined in claims 5-9 is evident from the treatment of diabetes, he should consider that the same conclusion could be made from D1 (P9 L7, claim 29) which discloses already the treatment of diabetes with phenylamino derivates following formula (I).

Therefore the subject matter of claims 5-9 is not inventive (Article 33(3) PCT).

#### **Claims 26-55**

claims 26-29, 32, 33, 35-55

(N)(IS)

Independent claim 26 describes the use of phenylamino derivates following formula (I)(A) of claim 26 for treating chronic pain.

D2 discloses phenylamino derivates following formula (I)(A) of claim 26 for treatment of cancer (D2, P7 L7, claim 26), diabetes (D2, P7 L7, claim 31) and inflammation (D2, Abstract).

Documents D3 (compound 116702-62-6P), D4 (compound 90656-46-5P) D5 (compound 4a (Scheme 2)), D6 (compound IV.2 Scheme 2), D7 (compound 13278-40-5) disclose compounds falling under formula (I)(A) of claim 26. These documents describe the use of these compounds as inflammation inhibitors or antiarthritics (D4).

According to the description of the present application cancer (P1, L32), diabetes (P1, L15; claim 29), inflammation (claims 29 and 32) and arthritis (P1 L19, claims 29 and 33) are associated with neuropathic pain. Thus the treatment of cancer, diabetes inflammation and arthritis implies the treatment of the associated pain. Consequently the subject matter of claim 26-29, 32, 33 35-55 is not novel and inventive (Article 33(2) and (3)).

#### claims 30, 31, 34

(N) D2 discloses the use of phenylamino derivates following formula (I)(A) of claim 26 for treatment of proliferative diseases like cancer and inflammation. Malfunctions as defined in claims 30, 31, 34 are not disclosed. Therefore the subject matter of

### **EXAMINATION REPORT - SEPARATE SHEET**

claims 30, 31, 34 is considered to be novel.

(IS) There is no evidence in the description of the present application, which suggests that compounds as defined in claim 26 have an effect for the treatment of chronic pain associated with malfunctions described in claims 30, 31, 34. All biological examples (P46-53) are based on the treatment of diabetes. However no basis for the treatment of chronic pain associated with the claimed malfunctions is given. If the applicant is the opinion that the treatment of chronic pain associated with malfunctions defined in claims 30, 31, 34 is evident from the treatment of diabetes, he should consider that the same conclusion could be made from D2 (D2, P7 L7, claim 31) which discloses already the treatment of diabetes with phenylamino derivates following formula (I)(A) of claim 26.

Furthermore there is no evidence or data in the description of the present application, which suggest that chronic pain at all can be treated by compounds defined in claims 26-55. None of the compounds tested in the biological examples 1-3 (P46-53) contains a compound falling under formula (I)(A) of claim 26. Therefore the subject matter of claims 30, 31, 34 is not inventive (Article 33(3) PCT).

(IA) For the assessment of the present claims 1-55 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

#### Re Item VI

#### Certain documents cited

The following document is not considered to be part of the prior art (Rule 64.3 PCT).

D9: WO 00 42022 A

Priority Data: 16.12.198 and 10.11.1999

### **EXAMINATION REPORT - SEPARATE SHEET**

Filing Date: 15.12.1999

Publication Date: 22.07.2000

D9 discloses the use of compounds following formula (I) of claim 1 and formula (I)(A) of claim 26 for the treatment of different types of arthritis (D9; P24, L19-26). According to the description of the present application (P1, L19) diseases associated with neuropathic pain include arthritis.

In case the present application would enter the European Phase the abovementioned document, which is cited in the ISR, would be prejudicial to the novelty of the subject matter of claims 1-4 and 8, 10-25, 26-29 and 33, 35-55 of the present application.

#### Re Item VIII

#### Certain observations on the international application

Claim 26 is not clear (Article 6 PCT). The meaning of the "O" in the middle of the claim is not clear.

The compounds 3,4 Difluoro-2-(2-chloro-4-iodo-phenylamino)-Ncyclobutylmethoxy-benzamide and the following compounds of claim 17 do not fall into the formula of claim 13 from which they should be dependent.

The compound 5-Bromo-3,4-difluoro-2-(4-iodo-2-methyl-benzyl)-N-... (Claim 19, P99, L 23) does not fall under formula (I) of claim 1.

The compound on Page 100, Line 29 of claim 19 does not fall into the formula of claim 13 from which it should be dependent.

2 compounds described in claim 37 do not fall under formula (I)(A) of claim 26. Compound PD297447 (P52) could not be identified.

(PCT Article 18 and Rules 43 and 44)
